

## **VIII. The Transportation Industry – Motor Freight Carriers**

## **MOTOR FREIGHT CARRIERS**

### **A. CLASSIFICATION OF MOTOR FREIGHT CARRIERS**

Motor freight carriers are divided into three groups according to annual operating revenues. Effective January 1, 1994, the ICC eliminated the Uniform System of Accounts for common and contract motor carriers of property. This revised the classification threshold levels for Classes I, II, and III motor carriers. These levels are as follows: carriers having annual carrier operating revenues of \$10 million or more are Class I carriers. Class II carriers have annual carrier operating revenues of at least \$3 million but less than \$10 million. Carriers having annual carrier operating revenues of less than \$3 million are considered Class III carriers. This revision is intended to reduce regulatory and accounting burdens on the motor carrier industry.

All household goods movers that have certificates to operate in North Carolina are required to file an annual report with the North Carolina Utilities Commission. Failure to file this report could be grounds for the cancellation of their certificates by the Commission. Enforcement and compliance with the filing of annual reports on a timely basis requires a continuing effort by Commission personnel. On December 31, 2006, there were 268 household goods movers with certificates to operate in North Carolina. There were 254 annual reports filed with the North Carolina Utilities Commission for the year ended December 31, 2006 and fourteen companies' certificates were cancelled in 2007.

### **B. DUTIES OF THE OPERATIONS DIVISION, TRANSPORTATION SECTION (See Part E for Current Legislative Action)**

The Commission Staff Transportation Division is responsible for the administration of motor freight carriers of household goods operating within the borders of North Carolina. Authority for this activity is found in North Carolina General Statute Article 12 - Sections G.S. 62-259 through 289 and Commission Orders in Docket No. T-100, Sub 49. All applications for certificates of exemption, transfers of existing certificates, and cancellations of certificates are handled through this Division.

The Public Staff Transportation Rates Division has the responsibility for maintaining and reviewing annual reports of all household goods movers and auditing records and freight bills.

The Public Staff offers technical assistance to the Commission and the general public in dealing with transportation matters, including damage claims.

### **C. COMMISSION ACTIVITIES**

An amendment to the Public Utilities Act provides that if no protests are filed in opposition to the truck application, the hearing may be canceled with the matter decided on sworn shipper affidavits. The majority of truck applications are decided in this manner. The Commission sometimes settles tariff filings and other filings based on Public Staff and Commission Staff recommendations and studies presented at Monday morning conference sessions.

The Operations Division, Transportation Section, and Public Staff, Transportation Rates Division, hold monthly, day-long seminars throughout the state regarding the Commission's Maximum Rate Tariff (MRT), which governs all household moves within North Carolina. During the MRT Seminars, the tariff is thoroughly reviewed, and a hands-on training session is held in which participants rate sample moves. In 2006, 162 representatives from the moving industry attended these seminars.

### **D. SUMMARY OF OPERATING DATA**

A list of the household goods movers with selected operating financial data is shown in Figure No. 8-1. Figure 8-2 is a summary of household goods operations annual report information for 2006. It should be noted that the operating revenues for North Carolina are from freight moved on intrastate tariffs regulated by the North Carolina Utilities Commission only; therefore, they account for a very small percentage of the total revenues generated by this group of carriers.

## **E. LEGISLATIVE ACTION**

As of January 1, 1995 the ICC (Interstate Commerce Commission) preempted states over jurisdiction of the trucking industry. The North Carolina Utilities Commission has jurisdiction over Household Goods Movers only and; therefore, requires annual reports be filed by those transporters.

## **IX. The Transportation Industry – Motor Passenger Carriers**

## **MOTOR PASSENGER CARRIERS**

### **A. GENERAL COMMENTS**

For the purpose of filing annual reports, both the Federal Motor Carrier Safety Administration (FMCSA) (formerly the Interstate Commerce Commission) and the North Carolina Utilities Commission (NCUC) authorized the following classifications effective January 1, 1980, for the motor passenger carriers:

#### **CLASSIFICATION REQUIREMENTS:**

<b>Class I</b>	\$3,000,000 or more annual operating revenues
<b>Class II</b>	\$500,000--\$3,000,000 annual operating revenues
<b>Class III</b>	Under \$500,000 annual operating revenues

As of December 31, 2006, there were 39 motor passenger carriers franchised to operate under the regulation of the North Carolina Utilities Commission. See Figure Nos. 9-1 and 9-2 for a list of the companies. These companies include 23 transportation brokers, 13 motor boat (ferry) passenger carriers, and three motor passenger carriers. Transportation brokers, as herein used, means any person not a bona fide employee or agent of a motor carrier who engages in the business of selling or offering for sale any transportation of passengers by motor carriers for compensation, either directly or indirectly. A transportation broker does not own or operate the vehicles used to transport passengers to whom he sells or arranges for this type of service. The 23 brokers involved in this report are not required to file annual reports; therefore, there is no operating data shown in this report. Operating data is included for the sixteen motor passenger carriers who filed 2006 annual reports with the Commission.

### **B. REGULAR ROUTE PASSENGER CARRIERS**

Financial data is presented for the three regulated regular route passenger carriers having

separate operations during 2006 who filed annual reports with the North Carolina Utilities Commission. The carriers have franchise and operating rights to serve two or more points (from one city to another city) and are further classed and operate as common carriers over intrastate routes as regulated by the Commission.

### **C. FARE INCREASES AUTHORIZED--INTERCITY**

The FMCSA basically regulates the rate level of regular route bus fares. The Commission does receive tariff sheets for these companies as notification of rate changes.

### **D. PREEMPTION OF REGULATION OVER MOTOR CARRIERS OF PASSENGERS IN CHARTER BUS TRANSPORTATION**

In June 1998, Federal legislation was enacted which preempted the economic regulation of charter bus transportation on an intrastate and interstate basis. In summary the legislation allows a state to continue safety regulatory authority with respect to motor vehicles and to continue to regulate carriers with regard to minimum amounts of financial responsibility relating to insurance requirements and self-insurance authorization. Preemption also does not apply to intrastate commuter bus operations nor does it apply to intrastate regular route passenger transportation. The certificates issued to charter bus transportation companies were canceled by Commission Order dated September 9, 1998.
